The chart displays the monthly change in the number of people in the labor force. The y-axis represents the change in the number of people, ranging from -100,000 to 100,000. The x-axis shows dates from 11.05.2025 to 26.10.2026. Blue bars indicate a positive change, while orange bars indicate a negative change. The chart shows a general upward trend with significant fluctuations, including a sharp drop in late 2025 and a recovery in early 2026.

The chart illustrates the monthly fluctuations of the Consumer Price Index (CPI) for 2025. The blue line represents the monthly CPI, while the orange line shows the 12-month moving average. The index begins at approximately 101.5% in May, reaches a peak of about 103.5% in July, and then experiences a significant drop to around 100.5% in August, where it remains relatively stable through October.

Date	CPI (Blue Line)	CPI with 12-month moving average (Orange Line)

The chart displays the daily number of new COVID-19 cases in the Netherlands. The y-axis is labeled 'Nieuw aantal' (New number) and ranges from 0 to 1000. The x-axis shows dates from 11.05.2020 to 26.10.2021. The data shows a significant peak in late 2020, followed by a sharp decline and a period of low activity, with a small resurgence in early 2021.

The chart illustrates the monthly fluctuations of the Consumer Price Index (CPI) for the year 2026. The blue line represents the cumulative index, while the orange bars indicate the monthly percentage change. The index begins at approximately 118.5 in May, experiences a significant decline to a low of about 108.5 in July, and then recovers to a peak of approximately 119.5 in October, ending the year at about 118.5.

The chart displays the monthly change in the labor force. The y-axis represents the change in thousands, ranging from -10 to 10. The x-axis shows dates from May 2025 to October 2026. The data is represented by a blue line with vertical error bars. The labor force increases sharply from May 2025, reaching a peak of approximately 10,000 in September 2025. It then declines to around -5,000 by November 2025 and remains relatively stable with minor fluctuations until October 2026.

The chart displays the monthly evolution of COVID-19 cases in the Val de Aisne region. The y-axis represents the number of cases, ranging from 0 to 1,000. The x-axis shows dates from May 2020 to March 2021. The data is presented as a line with markers, showing a sharp increase starting in late 2020, peaking at nearly 1,000 cases in late 2020, followed by a decline and a second, smaller peak in early 2021.

The chart displays the monthly change in the number of employees in the manufacturing sector from 2015 to 2026. The Y-axis represents the change in thousands of employees, ranging from -10 to 10. The X-axis shows dates from 11.05.2026 to 26.10.2026. The data is presented as a line with markers, where blue indicates a positive change and orange indicates a negative change. The chart shows a general upward trend with significant fluctuations, including a sharp decline in 2020 followed by a recovery.
